

cardiac anesthesia and transesophageal pdf

x PERIOPERATIVE VISUAL LOSS (POVL) associated with non-ophthalmic surgery is a rare, serious complication. The main causes are ischemic optic neuropathy and retinal arterial occlusion 1,2 and less frequently cortical blindness, 3 acute glaucoma, 4 and choroidal and vitreous hemorrhage. 5 This review specifically relates to visual loss after cardiac surgery, which has received less attention ...

x Neuraxial anaesthesia is the most prevalent method of obstetric anaesthesia and analgesia. Recent figures show that 62.9% of women in labour in the United Kingdom give birth under neuraxial anaesthesia; 61% in the United States, 58.7% in Canada and 79.3% in France. 1â€“4 Despite their widespread use, neuraxial techniques are not free of complications.

Scimitar syndrome, or congenital pulmonary venolobar syndrome, is a rare congenital heart defect characterized by anomalous venous return from the right lung (to the systemic venous drainage, rather than directly to the left atrium). This anomalous pulmonary venous return can be either partial (PAPVR) or total (TAPVR). The syndrome associated with PAPVR is more commonly known as Scimitar ...

Scimitar syndrome - Wikipedia

Electrocardiography (ECG or EKG) is the process of recording the electrical activity of the heart over a period of time using electrodes placed over the skin. These electrodes detect the tiny electrical changes on the skin that arise from the heart muscle's electrophysiologic pattern of depolarizing and repolarizing during each heartbeat. It is very commonly performed to detect any cardiac ...

The use of this ground-breaking technology has inevitably been associated with a host of new problems. These new types of complications are frequently unrecognized or underestimated due to lack of familiarity with the normal and pathological appearance of transcatheter aortic valves (TAV) and often require redefining the strategies for diagnosis and treatment.
