Geometry 3.4 Name \_\_\_\_\_ Period \_\_\_\_\_ Follow the steps shown on the board to bisect each angle below: What is the relationship between the angle's rays and its bisector?

### Name Period Segments and Angles Geometry 3

In geometry, parallel lines are lines in a plane which do not meet; that is, two lines in a plane that do not intersect or touch each other at any point are said to be parallel. By extension, a line and a plane, or two planes, in three-dimensional Euclidean space that do not share a point are said to be parallel. However, two lines in three-dimensional space which do not meet must be in a ...

In photography, a lens hood or lens shade is a device used on the front end of a lens to block the Sun or other light source(s) to prevent glare and lens flare. Lens hoods may also be used to protect the lens from scratches and the elements without having to put on a lens cover. The geometry of a lens hood is dependent on three things: the focal length of the lens, the size of the front lens ...
