multilingual natural language processing pdf

Natural language processing (NLP) is a subfield of computer science, information engineering, and artificial intelligence concerned with the interactions between computers and human (natural) languages, in particular how to program computers to process and analyze large amounts of natural language data.. Challenges in natural language processing frequently involve speech recognition, natural ...

3 Processing Raw Text. The most important source of texts is undoubtedly the Web. It's convenient to have existing text collections to explore, such as the corpora we saw in the previous chapters.

3 Processing Raw Text - Natural Language Toolkit

Today, more of the world's population is bilingual or multilingual than monolingual. In addition to facilitating cross-cultural communication, this trend also positively affects cognitive abilities. Researchers have shown that the bilingual brain can have better attention and task-switching capacities than the monolingual brain, thanks to its developed ability to inhibit one language while ...

The Cognitive Benefits of Being Bilingual - Dana Foundation

Foreword Recent years have marked the beginning and expansion of the Social Web, in which people freely express and respond to opinion on a whole variety of topics.
