In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...

In numerical analysis, fixed-point iteration is a method of computing fixed points of iterated functions.. More specifically, given a function defined on the real numbers with real values and given a point in the domain of , the fixed point iteration is $x_{n+1} = f(x_n)$, which gives rise to the sequence $\{x_n\}$ which is hoped to converge to a point .If f is continuous, then one can prove that the ...

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.
