

orthopedic physical assessment magee pdf

The Sulcus sign is an orthopedic evaluation test for glenohumeral instability of the shoulder. With the arm straight and relaxed to the side of the patient, the elbow is grasped and traction is applied in an inferior direction. With excessive inferior translation, a depression occurs just below the acromion. The appearance of this sulcus is a positive sign.

Myotherapy (particularly Bonnie Prudden myotherapy) is a form of physical therapy which focuses on the assessment, treatment and rehabilitation of musculoskeletal pain and associated pathologies. The term myotherapy was originally coined by Bonnie Prudden to describe a specific type of trigger point therapy which she developed in the 1970s based on the earlier work of Travell and Simons who ...

Low back pain is one of the most common health problems and creates a substantial personal, community, and financial burden globally (1-4). As part of estimating the global burden of low back pain, with low back pain defined as "activity-limiting low back pain (+/- pain referred into 1 or both lower limbs) that lasts for at least 1 day" (), country-specific prevalence data were required.

A systematic review of the global prevalence of low back
