LIST OF PAPERS, WITH ABSTRACTS (in alphabetical order) Accurately Describing a Technology That Does Not Yet Exist - published March 2004 ABSTRACT: This paper explains CRNTM's ongoing process of defining and describing our work.

Nanotechnology: Our Published Papers

Exponential growth is exhibited when the rate of change "the change per instant or unit of time" of the value of a mathematical function is proportional to the function's current value, resulting in its value at any time being an exponential function of time, i.e., a function in which the time value is the exponent. Exponential decay occurs in the same way when the growth rate is negative.

Exponential growth - Wikipedia

In mathematics, the matrix exponential is a matrix function on square matrices analogous to the ordinary exponential function. It is used to solve systems of linear differential equations. In the theory of Lie groups, the matrix exponential gives the connection between a matrix Lie algebra and the corresponding Lie group.. Let X be an $n \times n$ real or complex matrix.
